The results speak for themselves...

“Moira has created a **very well organized and comprehensive online course on Autism and Sensory Processing**. She is a gifted presenter who generously shares her knowledge with confidence. Her passion for her work is evident. As an occupational therapist who has worked in the area of pediatrics for 25 years, I appreciated her insights on current shifts in practice. I **gained new knowledge that I was able to incorporate immediately into my practice**. Evidence-based information was embedded into every module. After completing this course I feel more confident in my ability to support clients with sensory processing challenges. In my opinion, **this course is essential for occupational therapists and other health professionals who work with autistic children.**”

**JULIE BIALLY
OCCUPATIONAL
THERAPIST**
